

Curriculum vitae

Personal details

Name	Nazar Nemoshchenkov
Email address	nazar.ua.b@gmail.com
Phone number	+380970262343
Address	Yuliia Zdanovska Street 55, Kyiv, Ukraine
Date of birth	15 July 2003

Employment

May 2025 - Present	Technician State Scientific and Technical Center for Nuclear and Radiation Safety, Kyiv Performed Design Basis Accident by modifying NPP thermal-hydraulic models in RELAP, processing and analyzing simulation results, and working with regulatory and technical documentation in accordance with nuclear safety standards.
Jul 2024 - Aug 2024	Service Center Technician Ekran Service Performed basic smartphone repairs, including screen and component replacement; consulted customers and completed service documentation.

Education

Sep 2024 - Present	Master's degree, Nuclear Physics Taras Shevchenko National University of Kyiv Master's thesis: "Accounting for external conditions in the modeling of a Self-powered neutron detector." The work focuses on Monte Carlo modeling of a rhodium-emitter detector using MCNP, MCNPX, and OpenMC, including the effects of coolant density, boric acid concentration, and fuel burnup on the detector response. Thesis repository on GitHub
2020 - 2024	Bachelor of Science in Physics and Astronomy Bachelor's qualification work: "Improvement of the Self Powered Neutron Detector (SPND) model"

Skills

OpenMC MCNP RELAP C++ Rust Python Batch Bash Docker Wolfram Mathematica LaTeX

Languages

English	B2
Ukrainian	Fluent

Internships

Jul 2025 - Aug 2025	Ukraine Summer Internship – Argonne National Laboratory Successfully completed a group project on Developing an Enhanced Concept of Defence-in-Depth for Advanced SMR Technology.
Jul 2025 - Jul 2025	IX Summer Nuclear School (Energoatom) Varash / Rivne NPP (RAES), Ukraine Prepared and delivered a presentation on SPND principles and applications in reactor monitoring and neutron flux measurements.
Apr 2025	Hackathon “Sustainable Energy in Ukraine” Host institution: UPB (EELISA European University) Exploring sustainable energy solutions and renewable technologies.
2022 - 2024	DAAD Taras Shevchenko National University of Kyiv and Technische Universitat Chemnitz As a DAAD scholar for several consecutive years, I enriched my academic experience with international perspectives and advanced coursework in semiconductor physics.

Extracurricular activities

Periodically participated in physics outreach events within the “Physical Space” project. Professionally produced videos serve as an additional showcase of my activities.

Courses

Nov 2023	Autum school on hight energy physics
